Please bring it in to the store!

Frill begins with whole fruit and vegetables and churns them into creamy deliciousness without the use of nut milks, added sugar, sweeteners or artificial ingredients. Available in three amazing flavors, Refreshing Green, Intense Chocolate and Bursting Berries, Frill is truly indulgence made healthy.

Each pint of Frill contains a mere 280-320 calories, that's 70-80 calories per serving plus all the vitamins and minerals found in fruit and vegetables and 8-10 grams of fiber. Certified gluten free and vegan Frill is also GMO free.

Frill comes to the US market from success in the UK and Sweden. We have an experienced in house operations and marketing team and have engaged a great PR team to help drive both media and consumer awareness.
