## Please bring it in to the store!

Frill is the perfect alternative to ice cream - made simply from whole fruits, vegetables and natural ingredients; without the use of nut milks, added sugar, sweeteners or artificial ingredients. Frill is available in four different flavors, Refreshing green, Intense Chocolate, Bursting Berries and Nutty Caramel.

Each pint of Frill contains a mere 280-340 calories, that's 70-80 calories per serving plus all the vitamins and minerals found in fruit and vegetables and 8-10 grams of fiber. Certified gluten free and vegan Frill is also GMO free.

Frill comes to the US market from success in the UK and Sweden. We have an experienced in house operations and marketing team and have engaged a great PR team to help drive both media and consumer awareness.
